PROFESSIONAL SUMMARY

Entry-level IT Support professional certified by Google and ITI, specializing in system administration, networking, and cybersecurity. Skilled in Linux, ethical hacking, and IT troubleshooting to deliver secure, reliable, and user-focused technical solutions.

EXPERIENCE

Freelance Yard **Remote, Egypt**

Project Coordinator – Part-time *Oct. 2026 – Present*

- *Coordinate coaching sessions across 5 student groups, tracking schedules, trainer attendance, and student participation.*
- *Monitor student attendance, assignment submissions, and weekly progress reports.*
- *Communicate with students and trainers regarding session schedules, attendance issues, assignments, and required submissions.*
- *Support program operations by following up on student requirements and ensuring timely completion of assigned tasks.*
- *Maintain and organize group records, planning documents, and reports using Google Drive and Google Sheets.*

Almentor Egypt **Port Said, Egypt**

Site Coordinator – Part-time *Feb. 2024 – Jun. 2025*

- *Supported instructors and students with basic technical issues (devices, software, and connectivity).*
- *Assisted in setting up laptops, projectors, and classroom equipment.*

Helped troubleshoot technical problems during sessions.

TECHNICAL & BUSINESS SKILLS

Technical: Linux (Ubuntu, Fedora), Windows, System Troubleshooting, Networking, Basic Cybersecurity, User & Device Support, Hardware & Software Installation.

Business: Customer Support, Technical Communication, Problem Solving, Time Management, Team Collaboration, Documentation.

PROJECTS

Superstore Sales Analysis – Personal Project | GitHub **SQL, Python, Power BI**

- Analyzed 10,194 order lines and 5,111 orders to evaluate sales performance, profitability, discount patterns, and return rates.
- Used SQL and Python to validate data, calculate business KPIs, and investigate profitability across product categories and regions.
- Built four reproducible charts and documented key findings, including the association between high discounts and negative profit margins.

Linux System Setup Script – Personal Project | GitHub **Bash**

- Developed a cross-distribution script to automate the initial setup of Linux systems.
- Streamlined installation of common applications, system settings, and desktop customization.
- Improved deployment efficiency and reduced manual setup time for Linux systems.

DownV Script – Personal Project | GitHub **Python**

- A clean CLI with interactive quality selection, audio extraction, and batch playlist support.
- Implemented duplicate detection and persistent local download history with search, count, and inspection commands.
- Integrated FFmpeg process pipelines for media/audio stream conversion and metadata handling.

Addch Script – Personal Project | GitHub **Go**

- Engineered a custom chapter file parser supporting millisecond precision, timestamp chronological validation, and UTF-8 BOM handling.
- FFmpeg stream-copy remuxing to add chapters without re-encoding the video or audio streams.
- Implemented clean 3-part architecture: addch (embed), rmch (strip), and getch (extract to stdout or sidecar).

EDUCATION

Port Said University – Faculty of Engineering **Egypt**

Bachelor's degree in electrical engineering (Computer & Control Engineering). 2025

- *Graduation Project Title: "Snack n' Track: AI-powered Nutrition Tracking App".*

CERTIFICATIONS

Google IT Support Professional Certificate | Link **Google**

Three-month IT support program, developed by Google, that covers troubleshooting, customer service, system administration, networking, operating systems, and security, and includes hands-on labs.

IBM Full Stack Software Developer Professional Certificate | Link **IBM**

Three-month full stack software program that covers cloud computing, Front-End with HTML, CSS, JavaScript, Git and GitHub, Docker, Back-End, and Python, and includes hands-on labs.

Google Data Analysis Professional Certificate | Link **Google**

A four-month data analysis program, developed by Google, that covers data cleaning, data analysis, spreadsheets, SQL, Tableau, and data visualization, and includes hands-on labs.
